

# Beaver Spirit Search Society

We are a nonprofit dedicated group that performs discreet and confidential spirit investigations and séances for anyone in need of this service for no charge. We use both scientific and spiritual means in attempting communication with human spirits from the other side. Our goal is to not only discover scientific data that points towards a possible spirit presence but also to open a door to communication. We want to try and answer not only if there is a spirit presence, but also who, why, and what so that we may help the spirits move on if needed and help the client in resolving whatever issues they may be having as a result of a haunting.

A haunting or spirit presence may manifest in various ways. You may feel a presence of someone or feel that you are being watched. There may be cold spots or even a feeling of being lightly touched. Some may see a fleeting shadow, blur, or light sometimes from the corner of your eye. Sometimes they present themselves through sounds or affecting electronic equipment or even moving items.

If you or someone you know is experiencing any of these manifestations please call for a free confidential evaluation.
